

Vita-Mulch

Perfect for new home construction and new planting beds!

- Produced from horticultural land clearing consisting of wood fiber, soil, sand, humus, and organic minerals.
- Works back into the soil to enhance base soil conditions.
- Perfect for all planting areas, exceptional when used in annual flower beds.
- Retains a deep, rich, dark texture and coloration.
- Best alternative to pine straw.
- Perfect for germination of landscape plants while acting as a weed barrier.
